## 4. Business documents

### 4.1. Project service plan

In order to protect your legitimate rights and interests and avoid worries, our company assures the user units that our company has the ability to implement the following standard warranty service terms, and provides relevant after-sales services in accordance with the contract after the user units purchase products and services.

#### 4.1.1. Technical support principles

1) In order to ensure the after-sales quality of this project, our company will dispatch professional after-sales engineers to provide localized services to provide users with stable after-sales guarantee.

2) When a user encounters a fault during normal use, please call our national unified service hotline to report it.

For repairs, we will provide unlimited telephone technical support services. 3) Provide

7\*24-hour hotline technical support; during critical periods, manual duty will be carried out according to user requirements, and

Current issues need to be resolved within 1 hour.

#### 4.1.2. Service goals

In the construction of this project, we will strictly follow the after-sales service policy of quality-oriented, customer first, excellence, and dedicated service. The overall project after-sales service satisfaction is greater than 95% as the project service goal. Based on the after-sales service commitment, we will provide user units with Satisfied with the efficient after-sales service.

Throughout the project phase, after-sales service engineers track and evaluate the project investigation list, after-sales service quality, fault response time, etc., and generate and save relevant after-sales service record sheets.

### 4.1.3. Service content

From the date of acceptance, free after-sales maintenance services will be provided for one year, including:

- 1) Free upgrade and update services are provided for all software related to the entire project.
- 2) Free maintenance services are provided for the hardware related to the entire project.
- 3) Provide 7\*24 hours online service, the fault response time is no more than 0.5 hours, and solutions are provided within 1 hour. If a fault needs to be solved on site, professional engineers will be dispatched to arrive at the site within 12 hours and solve the fault. There are no less than five ways to provide technical support services: telephone, email, fax, remote video, and on-site service.

After the project is completed, complete technical information will be provided to users, including equipment random information, application software source programs and media, user manuals, administrator manuals, installation guides and other user documentation.

### 4.1.4. Emergency response plan

During the construction of this project, if an unexpected situation occurs and the products and services purchased by the user unit cannot be used normally, the company will dispatch professional after-sales engineers to solve the fault for the user within 8 hours.

### 4.1.5. Major failure emergency plan

During the construction of this project, if a serious fault occurs and the products and services purchased by the user unit cannot be used normally, our company will dispatch professional after-sales engineers to solve the fault for the user within 4 hours, and provide spare parts for the purchased products free of charge. User trials ensure the normal development of the user unit's business.

## 4.2. Project service commitment

In order to ensure the normal operation of this project, our company solemnly makes the following commitments:

- 1) The project warranty period is three years. During the warranty period, our company will provide free maintenance and upgrades to all software and hardware, and provide sufficient spare parts for timely maintenance. During the equipment warranty period, our company will be responsible for any deficiencies or failures due to defects in product quality or construction quality.
- 2) During the equipment installation period, our company will send one professional technician to provide technical consultation and technical training to users, so that they can go to the installation site in time to deal with abnormal equipment problems. If the equipment fails during the warranty period, our company provides free replacement services and 7\*24 hours free technical support services.
- 3) If a malfunction or problem occurs, our company will provide technical response within no more than 1 hour.

If a fault or problem is solved remotely, our company will dispatch professional technicians to the scene within 24 hours.

If the fault cannot be eliminated within 24 hours, our company will provide spare products of the same grade free of charge for purchasers to use. If encountered

When major problems occur in the system, they will be completely resolved within 3 days. Due to the particularity of wood project construction, installation, commissioning, and maintenance, our company will set up a 24-hour service and maintenance team with a professional after-sales maintenance manager.

1) During the warranty period, in order to ensure the safety of the system, our company provides inspections once a quarter, evaluates and analyzes the overall operating status of the software and hardware equipment within the scope of maintenance, and fills in an equipment operating status assessment report. The inspection content includes: checking the current operating status and resource usage of the equipment; checking the system and equipment operating status; and checking the system security status.

5) For any deficiencies and failures in the system within the warranty and free maintenance due to defects in design and workmanship, our company will provide timely upgrade services to ensure the normal operation of the user's system.

### 4.3. Supplier's performance in the past 2 years and contracts currently being performed

### 4.4. Other contents that the supplier deems necessary to explain
